Our Discussion Today

- The Challenge: A Fragmented and Unreliable Citizen Support System.
- The Solution: Introducing Muyamuri / Umsizi.
- A Phased Path to Implementation.
- The Vision: A Unified, Intelligent Platform for All Citizens.
- Key Features & Benefits.
- Conclusion & Next Steps.

WHAT DO CITIZENS KNOW?

A SURVEY OF EMERGENCY NUMBERS AWARENESS

1

I DON'T KNOW

MOST COMMON ANSWER

2 AMBULANCE

994

3 FIRE BRIGADE

993

(HARARE)

OR 112 / 999

4 GENERAL EMERGENCY

112 / 114

999 / 995

5 POLICE NUMBERS HARARE

995

0242 748836 / 777777

6 BREAKDOWN SERVICES

0242 776760

OTHER POLICE NUMBERS FOUND IN POLICE STATIONS

7 POLICE BULAWAYO 663006 / 66340

8 POLICE MARONDERA 23500 / 66340

9 POLICE MASVINGO 64911

10 POLICE HARARE 733733-5

11 POLICE GWANDA 2911

12 POLICE MUTARE 63380

13 POLICE GWERU 2477

14 POLICE CHINHOYI 22299

15 POLICE BINDURA 9933

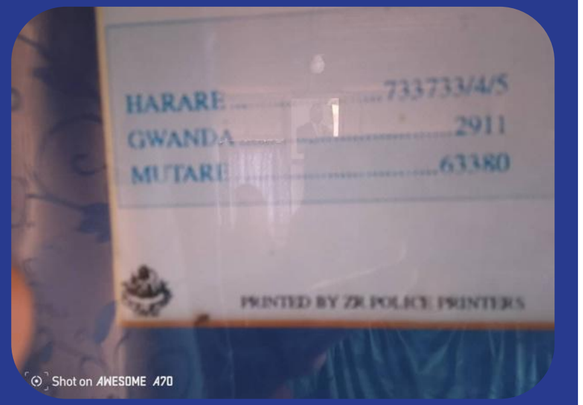

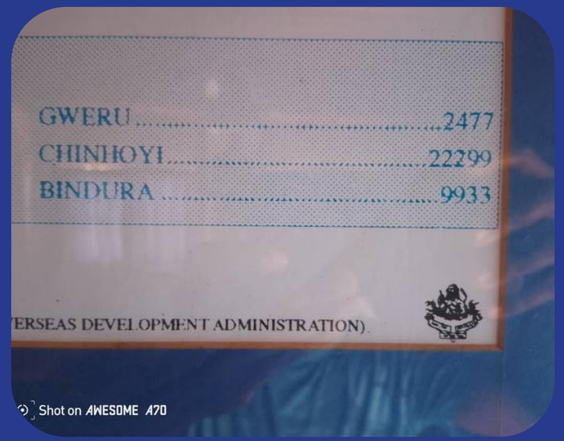

BE INFORMED. BE PREPARED. BE SAFE.

The Survey Evidence

🚑 Ambulance

- Ambulance directly: **994** (Harare public ambulance) plus numerous private ambulance service hotlines. AA Zimbabwe +1

🔥 Fire Brigade

- Fire Brigade: **993** (Harare) or reachable via **112/999**. AA Zimbabwe +1

Tips:

- Using **112** on a mobile is often easier as it automatically connects to the correct service (police/ambulance/fire) depending on your situation. GOV.UK
- Save the local police station's number too if you want a direct line rather than the general emergency line. Zimbabwe Republic Police

🚨 Emergency Numbers (Police • Fire • Ambulance)

📍 These are the key phone numbers used in **Zimbabwe**, especially Harare:

📞 Main Emergency Lines

- **112** – General emergency number from *mobile phones* to reach police, fire, or ambulance services. GOV.UK +1
  - (For NetOne mobile: **114** usually work well.) GOV.UK
- **999** – Traditional emergency number that connects you to *all emergency services* (police, ambulance, fire) in Zimbabwe. The Basetrip

🚓 Police

- Police emergency response number: **+263 (24) 995** (Harare) or **112/999 from mobiles**. AA Zimbabwe +1

POLICE CONTACT NUMBERS

EMERGENCY: +263 4 995

HOTLINE: (04) 748836/ (04) 777777

ROADBLOCK NUMBERS: +263 782 475 000

AMBULANCE SERVICES: 994

BREAKDOWN SERVICES: (04) 776760 / +263 0712 406 033

FIRE B
(04) 7

Other Current Solutions

MINISTRY OF TRANSPORT AND INFRASTRUCTURAL DEVELOPMENT

FOR IMMEDIATE RELEASE
Date: 19 January 2026

STATEMENT ON HOTLINES FOR REPORTING ROAD DEFECTS REQUIRING URGENT INTERVENTION IN ALL PROVINCES

The Ministry of Transport and Infrastructural Development reaffirms its commitment to safe, reliable, and well-maintained roads for all citizens. Our ongoing, significant investment in rehabilitating and maintaining the national road network is central to our mandate.

To this end, the public is advised that urgent road defects on Regional, Primary, Secondary, and Tertiary roads can be reported directly to our Provincial Roads Engineers, as listed below.

The Ministry calls on the public to become active partners in road maintenance by reporting potholes and urgent defects. Your vigilance is invaluable. Prompt reports enable faster response, efficient resource allocation, and prevent minor issues from becoming hazards. As articulated by **His Excellency, the President, Cde Dr. E.D. Mnangagwa**, our inclusive road efforts support the drive of leaving no one and no place behind.

HOW TO REPORT:

We have established dedicated **HOTLINES** in every province. To ensure swift intervention, please contact the Provincial Roads Engineer in your Province directly. For quick action, please send clear photos or videos and the precise location. The provincial contacts are as follows:

NO.	PROVINCE	PROVINCIAL ROADS ENGINEER	CONTACT
1.	Bulawayo Metropolitan	Eng. T. Nyikayaramba	0716 389 676
2.	Harare Metropolitan	Eng. A. Muchena	0772 351 730
3.	Manicaland	Eng. R. Sigauke	0784 355 892
4.	Mashonaland Central	Eng. J. Makokove	0712 883 069
5.	Mashonaland East	Eng. M.T. Pasipamire	0776 951 956
6.	Mashonaland West	Eng. S. Gomo	0735 721 521

Harare City

Key Reporting Channels:

- WhatsApp (Water/Sewer/General) : 0780630325
- WhatsApp (Billing/Accounts): 0788654356

A System Built on Silos

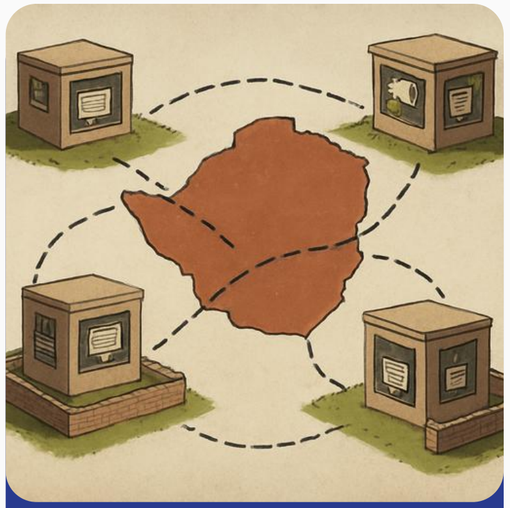

A Siloed Approach Creates Inefficiency and Delays

- Our current interventions are fragmented. Each service center operates its own independent system with its own number.

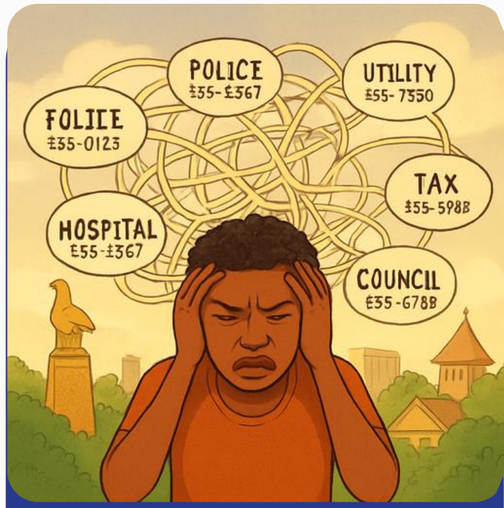

No Unified Command:

There is no central system to receive, triage, and coordinate a response across multiple agencies. A single incident (e.g., a veld fire threatening a village) might require fire, police, and medical services, but there's no single point to trigger all three.

Information Silos:

Critical information is trapped within individual departments. There's no shared, real-time picture of incidents across the province or country to enable proactive resource deployment.

Complexity for Citizens:

Saving numerous numbers for various departments and geo-locations is an unreasonable burden. In a moment of panic, finding the right one is nearly impossible.

The Consequences of a Fragmented System

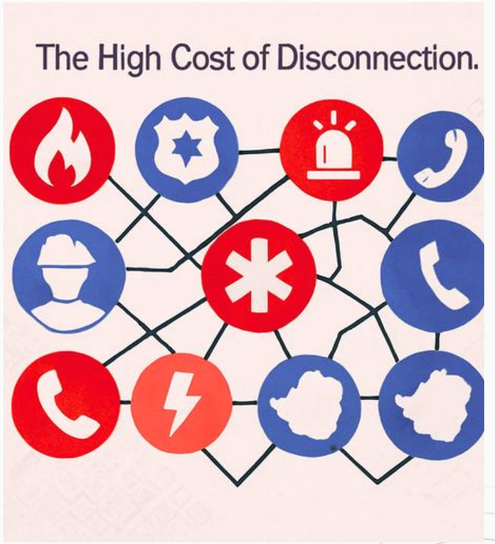

The High Cost of Disconnection.

Delayed Emergency Response: Precious minutes are lost as citizens struggle to find the correct, active number or acquire airtime. In an emergency, delays cost lives and property.

Unreported Infrastructure Issues: Potholes, broken water pipes, and illegal dumping go unreported because the process is unclear, leading to deteriorating public services.

Spread of Misinformation: In the absence of an official, accessible government communication channel, citizens are left vulnerable to rumors and false information on social media, undermining public trust.

Inefficient Government Operations: Resources are wasted on managing multiple, disparate systems, and decision-makers lack the comprehensive data needed for effective planning.

Vulnerable Communities: Farmers facing crop diseases or wild animal invasions lack a simple, immediate channel to alert authorities and request assistance.

Our Solution

Re-Imagine Citizen-Government interaction

The Key: Leveraging the platform already in the hands of millions of Zimbabweans

Our Vision: To create a unified, intelligent, and accessible digital front door to government.

A platform where every citizen, regardless of their digital literacy or financial means, can instantly:

1. Report any **emergency** and get help
2. Flag any municipal **service issues** and track resolutions
3. Access accurate **government information** and be protected from misinformation and disinformation

On WhatsApp
The platform millions already know and trust

AI-Powered
Understood in local languages. Built on trusted government data

Secure & Private
Your data is protected and never shared

For Every Citizen
Accessible, inclusive and always available

Muyamuri/Umsizi

"Muyamuri" (Shona - "Helper/Assistant")
"Umsizi" (Ndebele - "Helper/Assistant")

An AI-Powered Unified Platform for All.

1. Muyamuri/Umsizi is a comprehensive, AI-powered digital platform that integrates with WhatsApp to create a seamless, intelligent interface for all citizen-government interactions. It's not just another app; it's a service delivered on a platform citizens already know and trust.

2. **Zero-Cost to Citizen:** No additional airtime or data costs for core services. (Uses WhatsApp bundles)

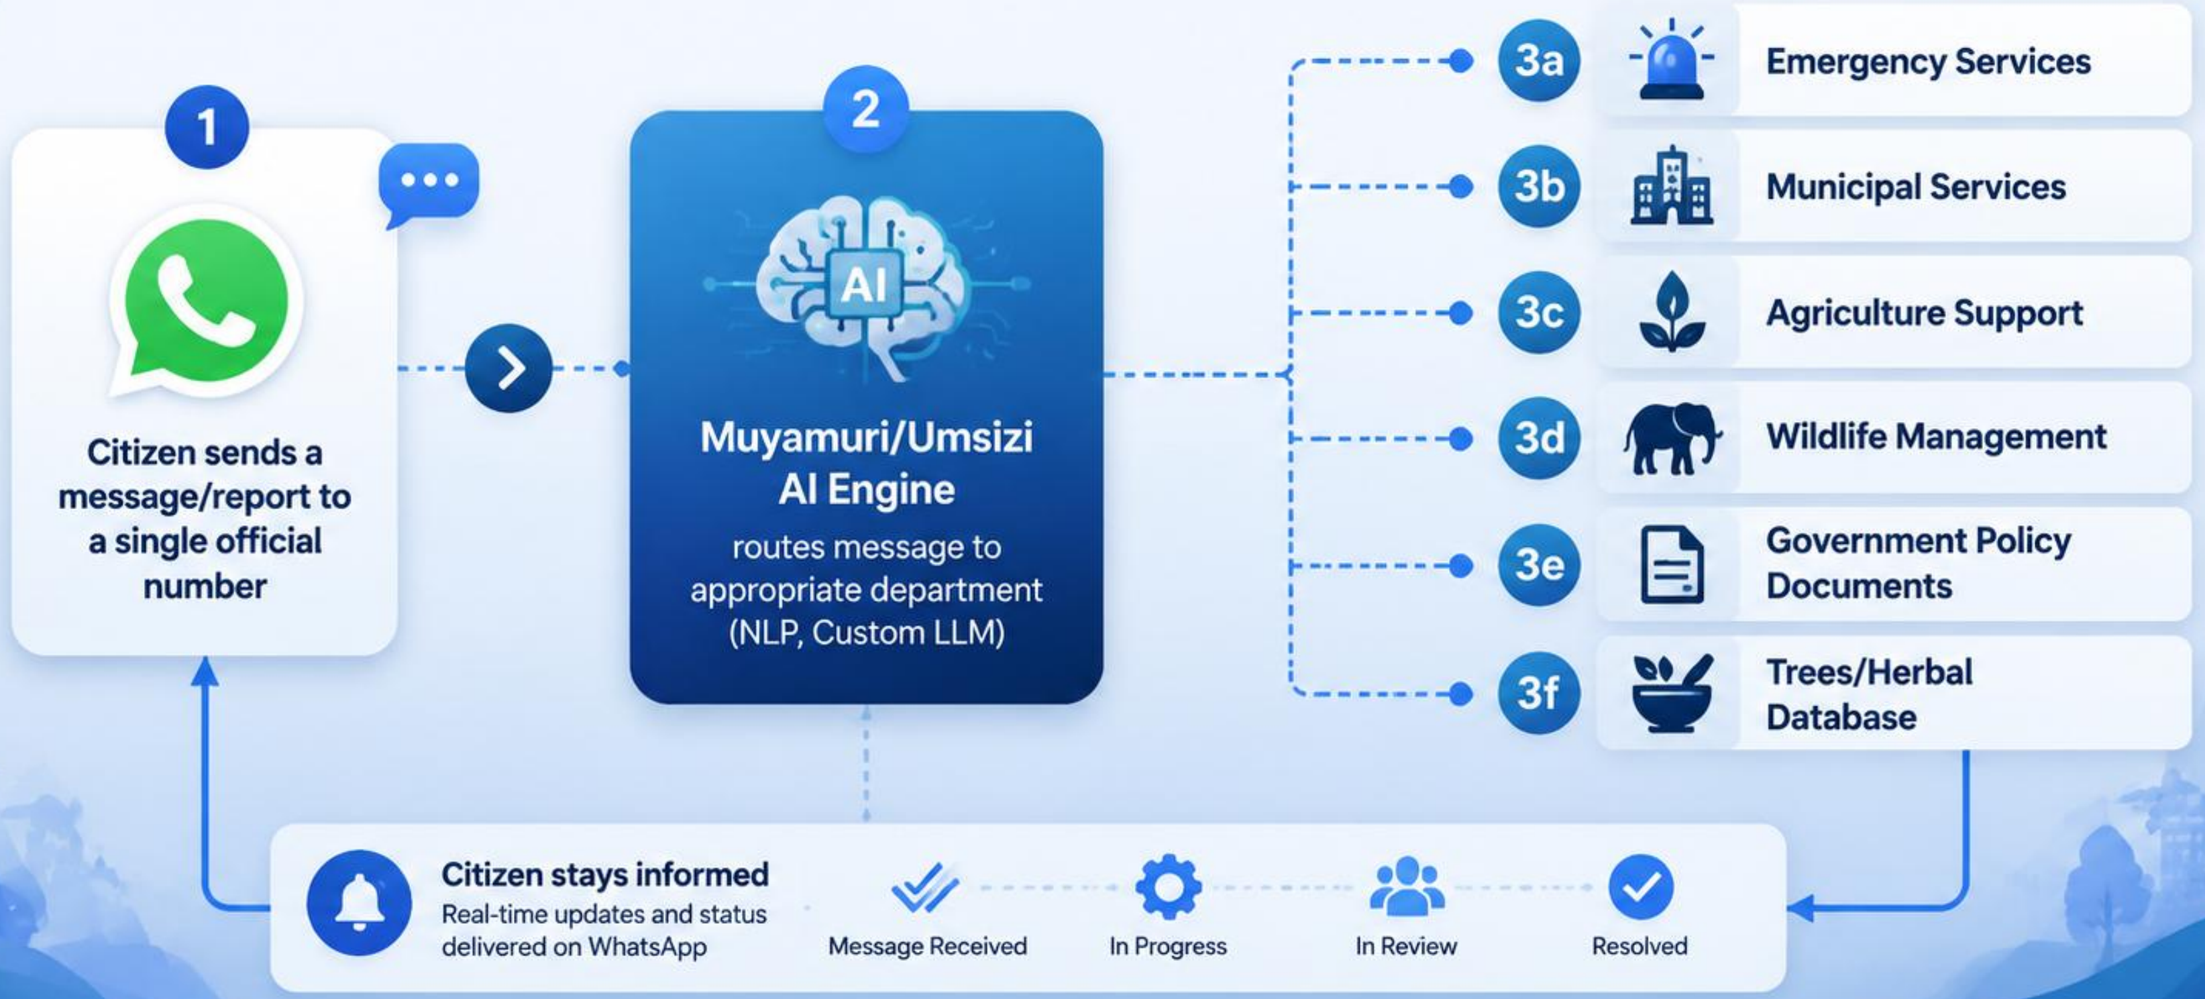

3. **One Number for Everything:** A single point of contact for all services.

4. **Works on Any Phone:** Accessible from basic smartphones to feature phones.

5. **AI-Powered Intelligence:** Provides instant, accurate, and documented responses.

The Unified Platform in Action

A single message is **intelligently understood, routed** to the right department(s), and **tracked**, all while the citizen stays **informed** on their familiar WhatsApp interface.

A Multi-Module Solution for a Multi-Faceted Problem.

Emergency Reporting

Instantly report fires, crimes, medical emergencies, and accidents. Automated triage and GPS location integration for rapid dispatch.

Municipal Services

Report potholes, burst pipes, or illegal dumping with photos and location. Track the status of your request transparently.

Agricultural & Wildlife Support

Get AI-assisted diagnosis for crop diseases, report wild animal invasions, and receive real-time alerts on pest outbreaks or weather events.

Government Communication Hub

Ask questions about any government policy and get instant, accurate answers with citations to official documents countering misinformation.

ENSURING ACCURACY, TRANSPARENCY, AND TRUST.

At the heart of the communication module is a Custom Large Language Model (LLM) with Retrieval-Augmented Generation (RAG)

How it works

1. A citizen asks a question on WhatsApp (e.g., "What are the new requirements for a passport?").
2. The AI searches a secure repository of official government documents, policies, and position papers.
3. It retrieves the most relevant information and generates a clear, concise answer.
4. Crucially, it provides a citation – the specific document, section, and page number – so both the citizen and government officials can verify the source.

Benefit

This eliminates ambiguity, ensures consistent messaging across all channels, and builds public trust in official information by directly countering misinformation with verifiable facts.

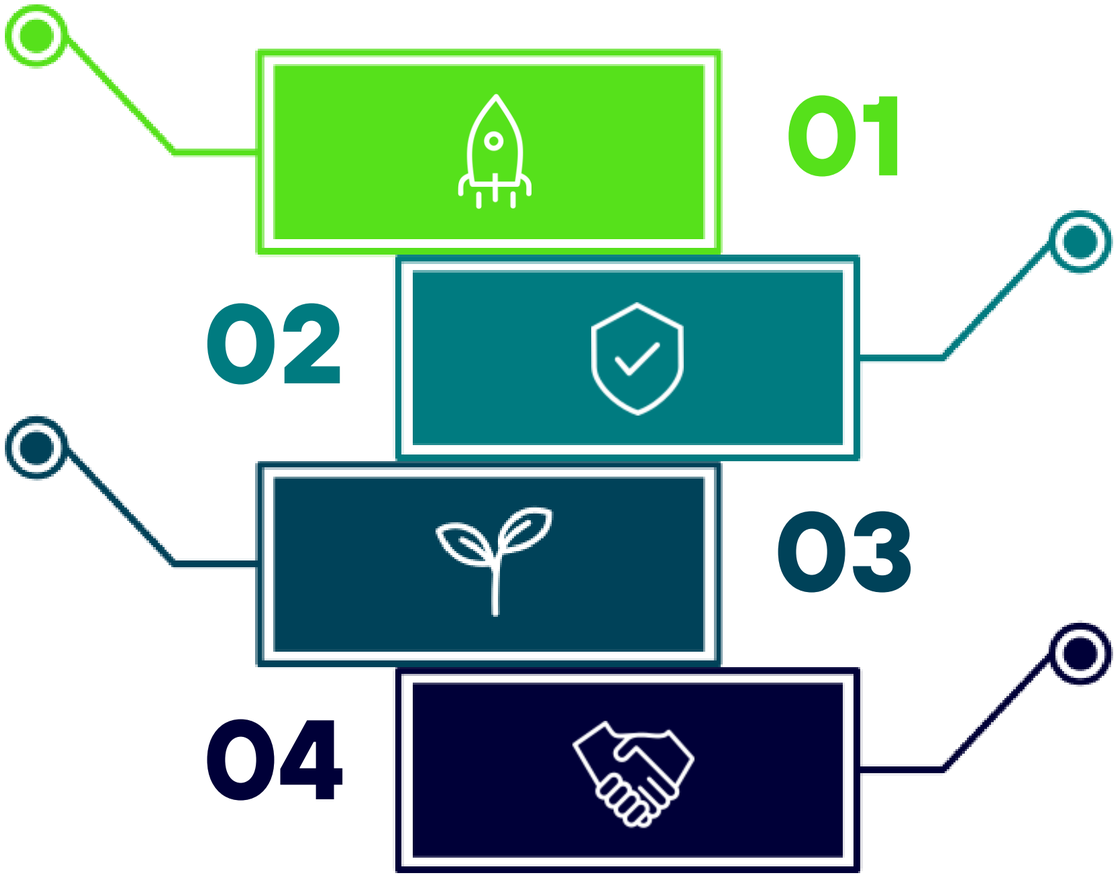

A Responsible, Government-Led Implementation Plan.

We present this plan with full respect for government protocols and priorities. It is a flexible framework, ready for your Ministry's guidance.

Core Launch

Deploy emergency & government comms modules. Pilot in a limited area.

Service Expansion

Add municipal & agricultural modules. Integrate with existing systems.

National Scale-up

Roll out to all provinces with full multilingual support.

Advanced Capabilities

Enhance AI, develop a mobile app, and deepen integration.

Transformative Impact Across Society.

For Government

- Unprecedented operational efficiency and resource optimisation.
- Data-driven decision-making from a unified analytics dashboard.
- Improved citizen satisfaction and trust.
- A powerful tool to disseminate accurate information and combat misinformation.
- A significant, tangible milestone in the national digital transformation agenda.

For Citizens

- 24/7 access, zero-cost, on a familiar platform.
- Faster emergency response.
- A simple, single point of contact for all issues.
- Empowerment through direct engagement and transparent tracking.
- Accurate, verifiable information, reducing confusion.

ABOUT US

Our vision is to be the leading force in Zimbabwe and beyond, in making sustainable technological innovation, data analytics and business intelligence accessible, understandable, and actionable. We aspire to help organisations of all sizes to leverage data for informed decision-making and stay ahead in today's data-driven world.

Our mission is simple yet profound: to empower our clients with data-driven insights and bespoke digital solutions. We are dedicated to enabling organisations to harness the full potential of their data. We accomplish this through expert data analysis, innovative solutions, and actionable recommendations

Decision Edge Consultancy Private Limited is a pioneering consultancy company based in Zimbabwe, established in 2023 by a team of passionate professionals. Our primary mission is to empower organisations by harnessing the transformative power of digital solutions, data analytics and business intelligence. We are strongly convinced that technological innovations and data hold the key to unlocking insights essential for driving successful corporate strategies.

VALUES

Integrity

As a firm seeking to partner with the government, we hold integrity as our foundational principle. For us, this means an unwavering commitment to transparency, ethical conduct, and data security in every interaction.

Continuous Learning

The fields of AI and public communication are evolving at an unprecedented pace. We are committed to a philosophy of continuous learning, ensuring that the Yamurai/Sizani platform does not become a static tool but a dynamic system that improves over time.

Collaboration

We understand that transformative projects like the Yamurai/Sizani platform cannot be imposed from the outside; they must be co-created. Our approach is rooted in deep collaboration, viewing the Ministry not just as a client, but as our primary partner.

Innovation

Our purpose is to bridge the gap between advanced technological potential and tangible public good. We believe innovation is not about chasing the newest trends, but about applying creative, intelligent solutions to real-world problems

Client-Centric

Our entire methodology is designed around a deep and abiding commitment to a client-centric approach. This means we prioritize the Ministry's strategic goals, operational realities, and established protocols above all else.

OUR PARTNERSHIP ASPIRATIONS

01 We heard and taken heed of H.E., our president's call and mantra to a better Zimbabwe, "**Nyika inovakwa nevene vayo**". We are committed to our brick.

02 Inspired by the NDS2 blueprint, we realised our technical ability can help with realisation of some of the identified 10 pillars as Government work to making Zimbabwe a middle class economy by 2030.

03 Co founded by young woman and with youthful stakeholders, we belive in taking our part in the national development to bring abount social impact leveraging technology and AI

A Call to Partner in Building the Future

- The Muyamuri/Umsizi platform is technically ready. It can begin delivering value to Zimbabwean citizens within weeks of approval.
- We are not here to dictate, but to support the government's vision with world-class technical expertise and a deep commitment to social impact.
- We propose an immediate next step: authorise a technical working group comprising our team and your Innovation and Incubation specialists to refine the scope, finalise the governance structure, and initiate a pilot project.

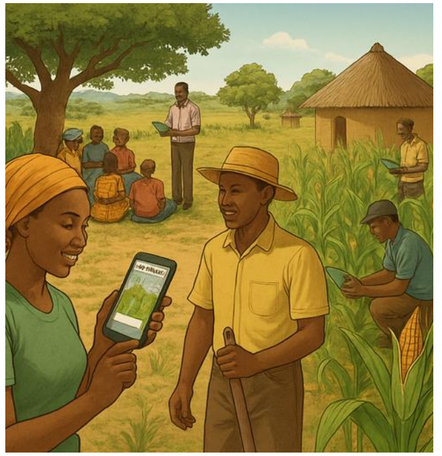

Director General, this is more than a chatbot. It is a platform for saving lives, building trust, and demonstrating the power of technology to serve the public good. We are ready to partner with you to make it a reality.
